Curriculum Vitae

Senior Software Engineer with 15+ years building everything from mobile apps to real-time data pipelines, now focused on AI development tools and infrastructure. I've shipped products used by millions and currently work at the intersection of distributed systems and AI-powered development workflows.

Professional Experience

Zendesk — Senior Software Engineer

November 2019 - Present | Dublin, Ireland (Remote)

AI Development Tools & Infrastructure (2025 - Present)

Early adopter and active contributor to the AI development tools ecosystem, building production workflows and infrastructure around Claude Code, MCP (Model Context Protocol), and AI agents.

- **Building AI-powered development workflows** using Claude Code and MCP to improve development velocity and code quality
- **Creating and deploying Skills** for development automation, reducing repetitive tasks and improving team productivity
- **Infrastructure development** supporting AI agent integration in production environments
- **Technical exploration** of emerging AI development patterns, sharing insights through detailed technical writing

Technologies: Claude Code, MCP, Skills, AI Agents, Python, Node.js, Infrastructure as Code

Big Data & Real-Time Analytics (2019 - Present)

Designed and maintained large-scale data pipelines processing millions of daily events, delivering real-time metrics to enterprise customers through the Zendesk Explore product.

- **Built and scaled the Explore Real-time system / Tech Lead**, ingesting 100M+ events daily and making metrics available with sub-minute latency
- **Core contributor to Explore-ZDP**, extracting, transforming, and loading customer data into the analytics ecosystem
- **Optimized distributed pipeline performance**, reducing latency by 40% and improving system reliability to 99.9% uptime
- **Enhanced observability** using Datadog, implementing comprehensive monitoring and alerting strategies

Technologies: Scala, Cats Effect, Apache Flink, Kafka, Snowflake, Redis, PostgreSQL, Redshift, Docker, Kubernetes, Terraform, Datadog

Zendesk — Android Engineer / Tech Lead

August 2018 - November 2019 | Dublin, Ireland

Led a team of Android engineers developing new features for Zendesk's real-time customer chat application.

- **Mentored engineers** on modern Android architecture patterns (MVVM, MVI) and best practices
- **Introduced CI/CD practices** that reduced release cycle time by 50%
- **Delivered key product features** improving user engagement and customer satisfaction

Technologies: Kotlin, Android, RxJava, Coroutines, Dagger2, Retrofit, WebSockets

Travelport Digital — Senior Android Developer

September 2016 - August 2018 | Dublin, Ireland

Guided a team building and maintaining the EasyJet mobile app, serving millions of travelers globally.

- **Led Android team** delivering features for 10M+ users
- **Modernized codebase** by introducing Kotlin, RxJava, and dependency injection
- **Improved app performance**, reducing crash rate by 60% and improving load times

Technologies: Android, Kotlin, Java, RxJava, MVP, Dagger2, Retrofit

Movile — Fullstack Software Engineer (Mobile & Backend)

December 2011 - July 2016 | Campinas, Brazil

Developed multiple mobile products across eCommerce, ticketing, food delivery, and messaging platforms in a fast-paced startup environment.

- **Built products from scratch** in a data-driven culture, shipping features based on metrics and user behavior
- **Full-stack development** handling both mobile (Android/iOS) and backend services
- **Cross-functional collaboration** with product, design, and data teams

Technologies: Android, iOS (Objective-C, Swift), Java, Ruby, REST APIs, MySQL, Redis

Kraft Consulting — Progress Software Engineer

January 2009 - December 2011 | Campinas, Brazil

Customized TOTVS Datasul ERP modules for finance, logistics, and operations clients.

- **Implemented ERP customizations** meeting specific client requirements across multiple business domains
- **Automated workflows** reducing processing times and improving efficiency

Technologies: Progress 4GL, TOTVS Datasul ERP

Technical Expertise

AI Development Tools & Infrastructure

Claude Code, MCP (Model Context Protocol), Skills, AI Agents, Development Workflow Automation, Python

Big Data & Distributed Systems

Scala, Cats Effect, Akka (Actor, Stream), Apache Flink, Kafka, Google Pub/Sub, Kinesis, Stream Processing, Batch Processing, Snowflake, Redshift

Cloud & Infrastructure (AWS)

ECS, EC2, Lambda, SQS, SNS, API Gateway, DynamoDB, CloudFormation, S3, Docker, Kubernetes, Terraform, Infrastructure as Code

Backend & Databases

Node.js, PostgreSQL, MySQL, Redis, RESTful APIs, WebSockets, Microservices

Mobile Development

Android (Kotlin, Java), RxJava, Coroutines, Dependency Injection (Dagger2, Koin), Espresso, Firebase, iOS (Objective-C, Swift), Flutter

DevOps & Monitoring

Docker, CI/CD, GitHub Actions, Travis CI, Datadog, Logging, Observability, Git

Notable Projects

Zendesk Explore Real-time

Large-scale analytics platform delivering real-time metrics to enterprise customers. Processing 100M+ events daily with sub-minute latency across globally distributed infrastructure.

Impact: Powers business intelligence for thousands of enterprise customers, enabling data-driven decision making in real-time.

[Learn more](#)

EasyJet Mobile App

Led Android development for one of Europe's largest airline apps, handling booking, check-in, and travel management for millions of passengers.

Impact: 10M+ downloads, serving millions of travelers annually with booking and flight management capabilities.

[View on Play Store](#)

Freezone (Network Tools)

Mobile tools suite providing network diagnostics and connectivity features, becoming one of the most popular utility apps in Brazil.

Impact: 10M+ downloads, top-rated utility app helping users diagnose and optimize their network connections.

[TechCrunch](#)

Ingresso Rápido (Ticket Marketplace)

eCommerce platform for event and movie tickets, processing thousands of daily transactions.

Impact: 1M+ downloads, connecting users with entertainment venues across Brazil.

Research

[Microsoft Kinect Accuracy in the kinematic analysis of the human movement](#)

Education

Bachelor's Degree in Information Systems Metrocamp & IBTA (Brazilian Institute of Advanced Technology) *January 2009 - December 2012*

Key Strengths

- **Early adopter mindset** — Quickly mastering emerging technologies and applying them to real-world problems
 - **Full-stack versatility** — Experience across mobile, backend, infrastructure, and data engineering
 - **Scale expertise** — Building systems that handle millions of users and billions of events
 - **Leadership & mentorship** — Growing engineers and driving team productivity through modern practices
 - **Data-driven approach** — Making decisions based on metrics, not opinions
-
